

1 21 January 2013 — Version 0.9.9

For auth keys and other session configuration, use: `msession` (formerly `mconfig`)

For bug reporting, use: `msession$debug()`

Collections now have four default views:

raw counts (**raw**)

normed counts (**nrm**)

no singletons, raw counts (**nsc**)

no singletons, normed counts (**nsn**)

Command reference now available with: `vignette("matR-quick-reference")`

The same document is available via: <https://www.github.com/MG-RAST/matR/inst/doc>

Runtime R-style help now available, such as: `?collection`

For the moment, docs are by and large limited to series of examples.

Significance testing of annotations available with: `?sigtest`.

2 14 January 2013 — Version 0.9.9
